

Doosan Forklift Part

Doosan Forklift Parts - Doosan Infracore Company Ltd. is a transnational organization consisting of Diesel Engines, Defense Industry products, Industrial Vehicles, Construction Equipment and Machine Instruments and Automation Systems.

In the United States, Doosan Infracore America Corporation is headquartered in Suwanee, Georgia. It is home to a 170,000 square foot production facility, which is the home of the Compact Equipment and Construction division. West Caldwell, New Jersey is home to the Machine Tool division and Cleveland, Ohio is home to the Lift truck division. The U.S. headquarters in Georgia facilitates a first rate parts operation capable of supplying an excess of 25,000 line items to support Lift Truck, Compact Equipment, Machine Tool and Construction customer needs.

With a association consisting of over 90 autonomous sellers, the lift truck group supplies quality materials handling equipment to the comprehensive North American marketplace. Doosan Infracore America Forklift sellers successfully operate in over 220 service and product sales locations all through Canada and the U.S. The lift truck product line remarkably includes 63 distinctive products consisting of 82 various battery and engine configurations of Electric-powered and Internal Combustion vehicles. Capacities of these various vehicle designs vary from 3,000 to 33,000 lbs. All trucks are built in an ISO 9001 qualified facility.

Doosan Infracore America is the fastest rising forklift and lift truck company in the North American market, due to its outstanding level of product performance and their consistently high level of buyer support and service given to all Doosan Infracore Lift Truck users. The U.S. forklift division based in Cleveland has a expert team knowledgeable in Product Sales, Purchasing, Advertising, Logistical and Technical Support.

Initially the domestic lift truck market in Korea was an open import enterprise. Korea Machinery Co. Ltd. begun in 1960, to import fully assembled forklifts as part of a home-based equipment expansion project. Product sales of these products were primarily targeted to state-run corporations, large scale businesses, and the armed forces. This ultimately led to a merger with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division commenced trade operations throughout Korea to overhaul and sell this heavy equipment. By 1978, a lift truck manufacturing plant was successfully completed. Continuous technical education grew to become the new focus for improving quality and product development.

Home-based lift truck business for Daewoo started in 1967 and grew to an astonishing 90% market share in Korea. By the 1980's, Daewoo's superior technological improvements combined with sales success placed them in a position of significant growth of their forklift operations.

Caterpillar Industrial Inc. of the U.S. in 1981, proposed a cooperative venture project to assist them in the highly competitive North American materials handling industry. This joint-venture proved highly profitable for Daewoo and their lift truck product sales expanded greatly. In 1984, the company finished development of a new facility to help in producing high end value-added products for export. In 1993, the corporation had a global sales network and started exporting models they had established through in-house expertise, as an independent brand. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing growth opportunities into international marketplaces.
