

## Toyota Forklift Part

Toyota Forklift Parts - Since 1992, Toyota Material Handling inc., U.S.A., also called TMHU, have been the top selling lift truck supplier in the United States. This company has been based out of Irvine, California for well over 40 years, providing a wide-ranging line of quality lift trucks. With a first-rate reputation of stability and reliability, Toyota lift trucks have thrived in the competitive resources handling market. Quality is the cornerstone of Toyota's notorious Toyota Production System practiced at all manufacturing facilities, including TIEM, which is stands for Toyota Industrial Equipment Manufacturing, located in Columbus, Indiana. The majority of the Toyota lift trucks sold in the U.S.A are built here.

All Toyota's manufacturing plants within Canada and the United States comply with the International Organization for Standardization or ISO 14001 standard. The Columbus TIEM plant has been honored on many occasions for its dedication to continuous improvement and its environmentally friendly systems. It is the first and only maker to offer EPA and CARB-certified Compressed Natural Gas powered lift trucks on the market. To illustrate, the Toyota 8-Series IC lift trucks emit 70% fewer smog forming emissions than the current centralized EPA standards and have complied with California's strict emission standards and regulations.

### Toyota Material Handling, U.S.A. - The Industry Leader

The president of Toyota Material Handling, U.S.A., Brett Wood feels that TMHU's achievement comes from its dedication to produce high quality lift trucks at the same time as providing outstanding client support and service. "We must be able to learn and predict the needs of our customers," said Brett Wood. "As a leader, our success also depends on our ability to address our customers' operational, safety and environmental cost issues."• TMHU's parent company, Toyota Industries Corporation, often known as TICO, is listed in Fortune Magazine as the world's principal lift truck provider and is amongst the magazines celebrated World's Most Admired Companies.

### Redefining Environmental Accountability

Toyota's parent company, Toyota Industries Corporation, has imparted an exceptional corporate values towards environmental management within Toyota. Toyota's loaded history of environmental protection whilst retaining economic viability cannot be matched by other corporations and unquestionably no other resource handling producer can yet rival Toyota. Environmental responsibility is a fundamental aspect of company decision making at Toyota and they are proud to be the first and only maker to provide UL-listed, EPA- and CARB-certified Compressed Natural Gas powered lift trucks. Yet another reason they remain a leader within the industry.

Toyota first released the 8-Series line of lift trucks in 2006, again exhibiting its leadership and innovation in the industry. Featuring an exclusive emission system that eclipsed both Federal EPA emission standards, and California's more environmentally friendly emission standards. The end product is a lift truck that produces 70 percent less smog forming emissions than the existing Federal standards allow.

What's more in 2006, Toyota established an affiliation with the Arbor Day Foundation, furthering their dedication to the environment. In excess of 57,000 trees have been planted in regional parks and national forests damaged by natural reasons such as fires, as a result of this partnership. 10,500 seedlings have also been distributed through Toyota Industrial Equipment's system of dealers to non-profit organizations and neighborhood customers to help sustain communities all over the United States

Toyota's lift vehicles provide improved productivity, visibility, ergonomics and durability, and most significantly, the industry's leading safety technology. The company's System of Active Stability, also known as "SAS"•, helps lessen the chance of accidents and injuries, and increasing productivity levels while minimizing the likelihood of product and equipment breakage.

System Active Stability senses many elements that might lead to lateral instability and possible lateral overturn. When one of those factors are detected, SAS instantly engages the Swing Lock Cylinder to stabilize the rear axle. This adjusts the lift truck's stability footprint from triangular in shape to rectangular, providing a major increase in stability which substantially reduces the probability of a mishap from a lateral overturn. The Active Mast Function Controller or the Active Control Rear Stabilizer also assists to prevent injuries or accidents while adding strength.

The SAS systems were initially used on the 7-Series internal combustion lift trucks which were put on the market in 1999. These systems helped boost Toyota into the lead for industry safety standards. Now, SAS is used on virtually every modern internal combustion models and is standard equipment for the new 8-Series. There are more than 100,000 SAS-equipped lift vehicles in operation, exceeding 450 million hours combined. The increased population of SAS-equipped vehicles in the field, along with required operator training, overturn fatalities across all designs have decreased by 13.6% since 1999. Furthermore, there have been an overall 35.5% drop in industry wide collisions, loss of control, falls and overturn from a lift vehicle for the same period.

Toyota's standard of brilliance reaches far beyond its technological achievements. The company maintains an extensive Operator Safety Training curriculum to help purchasers meet OSHA standard 1910.178. Instruction services, video tutorials and assorted materials, covering a broad scope of matters-from personal safety, to OSHA rules, to surface and load situations, are available through the seller network.

Toyota has maintained a permanent presence in the United States ever since its first sale. In 2009, Toyota Industrial Equipment Manufacturing, produced its 350,000th lift truck. This fact is demonstrated by the statistic that 99% of Toyota lift trucks bought in America at the moment are manufactured in the United States.

Situated in Columbus, Ind., the Toyota Industrial Equipment Mfg. campus equals 998,000 square feet of facilities across 126 acres. Facilities include a National Customer Center, as well as manufacturing operations and supply centers for equipment and service components, with the whole commitment exceeding \$113 million dollars.

The modern NCC was built to operate for TMHU clients and dealers. The facility includes a 360-degree showroom, a presentation theater complete with stadium seating for 32, an area for live product demonstrations with seating capacity for 120; a presentation theater; Toyota's Hall of Fame showcasing Toyota's history since the birth of its originator, Sakichi Toyoda, in 1867, and finally a instruction center.

TMHU has 68 sanctioned industrial equipment dealers, along with 189 dealership locations all through the United States, providing the most comprehensive and inclusive client support and customer service in the industry. The company's new and Certified Used lift vehicles, service, parts, and financing capabilities make Toyota dealerships a one-stop shop to ensure overall client satisfaction.
