

Barrel Clamps

Barrel Clamps - Referred to as "Barrel Clamp", this hydraulic attachment is actually utilized on lift trucks in order to clutch items that you need to transfer using the forklift. Normally, they are utilized to paper rolls, barrels, and handle kegs, with some barrel clamp designs being able to revolve the cargo. For instance, the rotate function allows a lift truck operator to be able to put in a vertically stored paper inside the horizontal intake of a printing press.
